RETURNED GOODS POLICY

All returns must be accompanied by a Returned Goods Authorization number, available by calling our Customer Service Department. Call Customer Service to obtain a Returned Goods Authorization number.

The following information is needed to request authorization for a return.

- Reason for return
- Date of purchase
- Invoice or PO number
- Product number and size
- Quantity to return

All authorized returns must be made within thirty (30) days of the invoice date and accompanied by the appropriate purchase order number and Returned Goods Authorization number.

Allowable schedule for authorized return.

- Products processed in error by Hayden Medical, Inc. will be credited in full
- Defective product will be credited in full
- Unless defective or shipped in error, any return accepted is subject to up to a 25% restocking fee (minimum of \$10.00)
- All returned items are subject to Hayden Medical, Inc. inspection and acceptance
- Product must be shipped prepaid

Non-returnable, other than for manufacturing defect.

- Engraved instruments or instruments etched or labeled by the hospital
- Products damaged beyond repair or refurbishment or not in saleable condition
- Instruments returned more than thirty (30) days after invoice date
- Custom, Special or modified items
- Disposable items and Pessaries

Used products must be returned sterile wrapped or they will not be accepted.

HAYDEN MEDICAL WARRANTY INFORMATION

Hayden Medical instruments are guaranteed against defects in material and workmanship. Hayden Medical will, at its option and without charge, either repair or replace any instrument which Hayden Medical determines to be defective in material or workmanship when used for its intended surgical purpose.

All instruments sold by Hayden Medical are warranted only to the original purchaser and only against defects in workmanship or materials which under the intended use render such instruments inoperable.

This Guarantee/Warranty shall be void in the event any Hayden Medical instrument is used for purposes other than as originally intended, is not maintained or cleaned properly, is damaged as a result of misuse or accident, or is repaired or altered by unauthorized persons.

The above is a limited warranty, and it is the only warranty made by Hayden Medical for Hayden Medical instruments. Hayden Medical makes no other warranty, express or implied, including any warranty of merchantability and fitness for a particular purpose, as well as any express or implied warranty to patients. Hayden Medical shall have no liability for consequential, exemplary or incidental damages even if it is aware of the possibility of such damages. No warranty or guarantee may be created by any act or statement nor may this warranty be modified in any way, except as a result of a writing signed by an officer of Hayden Medical. These limitations on the creation or modification of this warranty may not be waived or modified orally or by any conduct. The stated express warranty is in lieu of all liabilities or obligations of Hayden Medical arising out of, or in connection with, the delivery, use or performance of any Hayden Medical instrument. Hayden Medical neither assumes nor authorizes any representative or other person to assume for it any other liability in connection with Hayden Medical Instruments.

LS-300XL	300w Xenon brilliant "daylight" quality light. Expected lamp life of 650 hours. ACMI, Olympus, Storz, & Wolf turret
----------	---

To protect the patient and personnel from the laser and IPL, Hayden Medical offers a wide variety of stainless steel laser shields and instruments. Their non-reflective surfaces disperse laser and other sources of energy. Autoclavable, these are durable, low maintenance instruments.

The most popular, is the COX II ocular laser shield

- Designed to conform to the globe, with a vault over the cornea. The posterior surface and the rounded edges are highly polished to assure patient's comfort and safety during wearing time as well as during insertion and removal.
- With no bulky and heavy handle, each shield includes a suction cup, for easy insertion and removal. The Cox II, with suction cup, is ideal for blepharoplasty.
- These elongated shields have an improved non-reflective front, which offers, the personnel even more protection from the laser.
- Cox II® is 1mm thick; double the thickness of the original Cox®.

OP21-261	x-small, 22 x 19.5mm
OP21-262	small, 24 x 21mm
OP21-264	med., 25.5 x 22mm
OP21-266	large, 26.5 x 23mm

Cox® II H*, with offset handle

Medial

- Like the Cox II, the Cox II H is also vaulted at the cornea, is marked for size and has a safety ring at the edge.
- The posterior surface and the edges are well rounded and polished, i.e. of exceptional quality to avoid hurting the patient and for his/her comfort.
- The Cox II H with offset handle facilitates insertion and removal. The handle is near the lower lid to allow closure without the upper lid pressing on the handle and causing rotation or displacement of the shield, minimizing risk of corneal irritation or exposure of the globe.
- Cox II H, left and right (s, m, l)

In three sizes, left and right:

OP21-262H	L or R, small 24 x 21mm
OP21-264H	L or R, medium 25.5 x 22mm
OP21-266H	L or R, large 26.5 x 23mm

The SUTCLIFFE shields, with all surfaces nonreflective for safe use with the laser, come in many configurations for various applications. The same basic piece is available modified in design to shield different parts of the body. You can shield eyelashes, eyebrows, eyelids, freckles, lips, gums, teeth, etc. and any tissue (deep or superficial) needing protection. Useful during skin resurfacing, incisional procedures, skin depigmentation, etc. In surgery, they can serve as an instrument for retracting tissue and as a backstop. You will discover many uses for it. The bent model is easier to pick up when gloved.

OP21-275 Sutcliffe laser shield (flat)

OP21-276 Sutcliffe laser shield (bent)

Laser & Non Laser Eye Shields

Durette® IV externals* 11
with movable metal nasal and temporals

- Both the nasal and temporal pieces can be moved away from area to be treated, without affecting proper shields' position.
- Metal cups (regular or small) with metal attachments.
- Choice of using temporal pieces or hook for direct attachment of the elastic.

OP21-555, regular or OP21-552, small. Durette® IV external laser shields, with mobile metal attachments. Includes 1 assembled pair external shields and extras. Total parts comprise 2 metal cups, 2 nasal and 2 temporal metal attachments, 2 elastic headbands and a medium plastic sterilizing tray.

Replacement metal parts.

- OP21-550N Replacement metal attachments, 2 nasals.
- OP21-550T Replacement metal attachments, 2 temporals.
- OP21-536 Spare black elastic headbands with cordlock (5)
- OP21-537 Spare white elastic headbands with cordlock (5)

Premium Quality Autoclavable Plastic Ocular Shields

Bilateral (Can be used with both eyes)

Size	One bilateral with suction cup (length x width)	One bilateral with handle	
		Black	Transparent-yellow

Handle

DESIGNED FOR YEARS OF TROUBLE-FREE USE

Bantam | PRO, LA952 is designed and engineered to be the most reliable and durable generator available today. The unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Unit cleanup is simplified by its non-absorbing, non-staining, high-impact ABS enclosure.

COMPACT, MOBILE, ELECTROSURGICAL SYSTEM

Standard package includes the unit, power cord, reusable handpiece, non-sterile drapes, 2 sterile drapes, 5 sterile disposable electrodes, 6 disposable sterile dermal tips, 12 disposable non-sterile dermal tips, 2 reusable grounding cord, 5 disposable split grounding pad, wall mount kit and users guide.

BOVIE GENERATOR

50 Watts – Cut, Blend, Coagulation

Isolated Power

THE GENERATOR

The Bantam | PRO, LA952 is a high frequency desiccator with cutting ability. You might call in a split personality. One half of the unit is a high frequency desiccator, an upgrade to our very popular Aaron® 940. The other half is a Bovie Generator, giving you 50 watts of cutting power and coag capabilities- plenty of power for most cutting procedure performed in the doctor's office.

THREE MODES OF OPERATION

The Generator offers you up to 50 watts in Cut mode, Blended Cut mode, and Pinpoint Coagulation mode.

All industry-standard 3/32"(0.24 cm) disposable and reusable electrodes fit the A902 handpiece. Handpieces may be autoclaved for greater operating efficiency and maximum cost control.

HIGH FREQUENCY DESICCATOR

40 Watts – Fulguration

40 Bipolar

40 Micropolar

.1-10 Watts – Adjustable in 1/10 watt increments

LA952

DIMENSIONS

Height: 188 mm (7.40 in.)
